PROFESSIONAL SUMMARY

Software Engineering undergraduate with a strong foundation in full-stack development, database design, and object-oriented programming. Experienced in building academic applications using Java, PHP, JavaScript, React, MySQL, Hibernate, and RESTful APIs, with hands-on experience in authentication, payment integration, database architecture, and backend development. Passionate about writing clean, maintainable code, solving technical problems, and continuously learning modern software engineering practices. Seeking a Software Engineering internship to apply technical knowledge in real-world projects and grow as a professional software engineer.

EDUCATION

IIC University of Technology Expected 2027
Bachelor of Software Engineering (Undergraduate)

Java Institute for Advanced Technology Completed
Higher Diploma in Software Engineering

TECHNICAL SKILLS

- **Programming Languages:** Java, PHP, JavaScript, HTML5, CSS3.
- **Frameworks & Libraries:** React.js, React Native, Bootstrap, Java Swing, JAX-RS (Jersey), Hibernate ORM.
- **Tools & Version Control:** Git, GitHub, VS Code, NetBeans, Figma, cPanel, JasperReports.

DATABASE MANAGEMENT & LOGICAL STRUCTURING

- **DBMS Expertise:** Strong proficiency in MySQL and Relational Database Management Systems.
- **Data Logic & Architecture:** Skilled in designing normalized database schemas (up to 3NF) and developing Entity Relationship Diagrams (ERDs) to eliminate data redundancy.
- **Operations & Integration:** Experienced in executing complex HQL/SQL queries, JOIN operations, and integrating Java/PHP backends with databases using JDBC and Object-Oriented custom database classes.

ACADEMIC PROJECTS

1. LUMIERE - Professional Fashion E-Commerce Platform *Java, Hibernate, MySQL, JS*
University E-Commerce Project

- Developed a full-stack e-commerce web application utilizing a RESTful API approach with JAX-RS.
- Engineered a normalized 19-table database schema and handled Object-Relational Mapping (ORM) via Hibernate.
- Independently coded secure user authentication with Jakarta Mail SMTP for OTP verification and integrated the PayHere payment gateway using cryptographic MD5 hashing.

2. Hospital Management System (HMS) *Java Swing, JDBC, MySQL*
University Desktop Application Project

- Developed a comprehensive desktop-based HMS to streamline patient registration and doctor appointments.
- Implemented secure CRUD operations using JDBC Prepared Statements to prevent SQL injection vulnerabilities.
- Integrated the JasperReports library to generate professional PDF/Excel reports and implemented a custom Barcode generation module for physical patient file tracking.

3. TechNova - High-End Tech E-Commerce *PHP, JavaScript, MySQL, HTML5/CSS3*
University Web Application Project

- Built a responsive premium e-commerce platform featuring a modern 'Dark Glassmorphism' UI design.
- Coded an asynchronous front-end utilizing AJAX and JavaScript FormData for dynamic, page-reload-free interactions.
- Developed a custom Object-Oriented PHP Database class to handle backend data manipulation, live search functionality, and secure Two-Factor Authentication (OTP).

LANGUAGES & ADDITIONAL INFORMATION

- **Languages:** English (Professional Working Proficiency), Sinhala (Native).
- **Notice Period:** Immediate (Available to start work immediately).
- **Soft Skills:** Logical Problem Solving, Fast Learner, Adaptability, Self-Starter.
